The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 11, 12, 15, 16, 18, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Gear.

Gear shows a hose reel with hub 26, bearing 32 and axle 34 at the lower portion of Figures 1 and 3 and riser 40 at the upper portion, spool sections 15, 18 at the upper portion which can be collectively read as a component abutting the lower section 15.

Worm gear 51 is read as a ring gear and the on off control of motor 97 can be read as a speed control. Rods 20 are read as studs.

Applicant's arguments have been fully considered but they are not persuasive. Even though the Gear drawings are different than the instant drawings, the Examiner is of the opinion that the broad scope of the claims is fairly met by the reference, *i. e.* each element recited in the claims is fairly found in Gear. The drive train of Gear comprises the motor through the central flange of element 15, through which the rods 20 extend to secure the reel. The motor and gear train are held stationary and extend laterally, and the flange of element 15 and the hose reel are driven in rotation. Such structure corresponds identically with the instant hose reel.

Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gear in view of Sheetz.

Gear shows the claimed device except for the spool component details. Sheetz shows a hose reel with spool sections 18, 19 tapered toward the inside so they can be nested. It would have been obvious for one of ordinary skill in the art at the time the

invention was made to have used such tapered spool sections with the reel of Gear to similarly provide for nesting the sections and under the rationale set forth in KSR v. Teleflex, 550 U.S. ___, 127 S. Ct. 1727, 82 U.S.P.Q.2d 1385 (2007) that the simple substitution of one known element for another to obtain predictable results is obvious.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
